# Pankaj Salunke

Full Stack Developer

Pune, India | +91 7447890852 | salunkepankaj520@gmail.com | LinkedIn | GitHub | Portfolio

## Profile Summary

Full Stack Developer with an MSc in Computer Science, building web applications with React.js, Node.js, Express and MongoDB. Currently a Frontend Intern at PJSofttech, working on a company inventory management system with React, Java and MySQL. Experienced in JWT authentication, role-based access, REST API integration and reusable UI components. Looking for a frontend or full stack developer role.

## Experience

**Frontend Intern, PJSofttech, Pune** July 2026 – Present

- Developing the frontend of an Inventory Management System using React.js, Tailwind CSS, Java and MySQL.
- Built order, product type, sub category and attribute management screens using reusable paginated tables, forms and modals.
- Integrated backend REST APIs and used React Query for data fetching, caching and keeping the UI in sync after create, update and delete actions.
- Fixed UI bugs and data display issues, and worked with backend developers using Git for feature development and code integration.

## Projects

**Inventory Management System** | *React, React Query, Tailwind, Java, MySQL* (Company Project)

- Built the order management module with filtering and status handling, so users can find orders quickly and track them through their stages.
- Developed separate product type, sub category and attribute management pages, each with server-side pagination for large data sets.
- Created reusable components (paginated tables, forms and modals) shared across modules, keeping the UI consistent and reducing repeated code.
- Connected the screens to the Java/MySQL backend through REST APIs, using React Query for data fetching and refreshing lists after changes.
- Debugged UI and data issues and collaborated with backend developers through Git.

**Room Booking Application** | *React, Node.js, Express, MongoDB, JWT, Cloudinary, Tailwind* GitHub

- Full-stack room rental platform where owners list rooms and seekers browse them, with role-based access for owners, seekers and admins.
- JWT authentication with bcrypt password hashing, separate user and admin middleware, and blocked-account checks.
- Room listings with multi-image upload to Cloudinary, city search, rent sorting, pagination and a details page.
- Interest-request workflow (send, accept, reject, cancel) that blocks duplicate requests and requests on your own room, with owner-only approval.
- Admin dashboard with stats, user and room search, user block/unblock, and room close/delete.

**Employee Task Management** | *React, Node.js, Express, MongoDB, JWT, Tailwind, Context API* Live link · GitHub

- Separate registration, login and JWT-protected routes for admins and employees, with bcrypt password hashing.
- Admins assign tasks to employees by email and view the tasks they assigned.
- Employees accept, reject, complete or fail tasks, with server-side rules for valid status changes.
- Admin and employee dashboards with task statistics and protected routes using React Router.

**Portfolio Website** | *React.js, Tailwind, EmailJS* Live link

- Responsive single-page site with typing animation, smooth scrolling and a working contact form.

## Education

**MSc Computer Science, R.B.N.B College, Shrirampur** 2023 – 2025
**BSc Computer Science, R.B.N.B College, Shrirampur** 2020 – 2023
**HSC, R.B.N.B College, Shrirampur** 2019 – 2020

## Technical Skills

- **Frontend:** React.js, JavaScript (ES6), HTML5, CSS3, Tailwind CSS, Bootstrap, React Router, React Query, Axios
- **Backend:** Node.js, Express.js, Core Java, REST APIs, JWT authentication
- **Databases:** MongoDB, MySQL
- **Tools:** Git, GitHub, Postman, Cloudinary
